

Three questions about evaluation in Recommender Systems

1. How comparable are reported results with precision-oriented metrics ?

1. How comparable are reported results with precision-oriented metrics ?
2. How meaningful are absolute performance metric values?

1. How comparable are reported results with precision-oriented metrics ?
2. How meaningful are absolute performance metric values?
3. How sensitive are the recommenders to different evaluation methodologies?

Comparative experiments with different metrics and alternative offline experimental designs

Precision-Oriented Evaluation of Recommender Systems: An Algorithmic Comparison
