## UMAP 2022 Chairs' Welcome

**ACM UMAP – User Modeling, Adaptation and Personalization** – is the premier international conference for researchers and practitioners working on systems that adapt to individual users or to groups of users, and that collect, represent, and model user information. ACM UMAP is sponsored by ACM SIGCHI and SIGWEB, and organized with User Modeling Inc. UMAP is the successor of the biennial User Modeling (UM) and Adaptive Hypermedia and Adaptive Web-based Systems (AH) conferences that were merged in 2009.

For the first time in the history of the conference, ACM UMAP 2022 ran in **hybrid mode**, with the opportunity for speakers and attendees to participate onsite or online, hosted at the University Pompeu Fabra, Spain. The conference runs over 4 days, with the classic tracks that characterize it, spanning from papers, workshops, tutorials, late breaking results, and a Doctoral Consortium. With the help of our Local chairs (Cristian Consonni and Mihnea Tufiş) and Streaming & Broadcasting chairs (Walter Anelli, Lesly Miculicich, Lorena Recalde, and Mete Sertkan) this new format was developed in a manageable way to offer a rich attendance to both online and onsite participants.

In addition, this year we are celebrating the **30th anniversary of UMAP**. Since no celebration can be done alone, ACM UMAP 2022 is co-located with ACM WebSci 2022 and ACM Hypertext 2022, both happening in Barcelona a few days before the conference.

To celebrate this anniversary, new topics enriched our main track: “virtual assistants and human-robot interaction” and “research methods and reproducibility.” New this year was the fact that the personalized recommender systems track was cross-listed with the ACM Hypertext conference, and the track chairs did an excellent job of coordinating the review processes across the two conferences. Moreover, to mark the 30th anniversary of the UMAP conference, we organized the Theory, Opinion and Reflection track to reflect on qualitative and quantitative analyses while welcoming blue-sky and innovative ideas, with two accepted papers being presented in the conference.

ACM UMAP covers a wide variety of research areas where personalization and adaptation may be applied. This includes a number of domains in which researchers are engendering significant innovations based on advances in the areas of user modeling and adaptation, recommender systems, adaptive educational systems, intelligent user interfaces, e-commerce, advertising, digital humanities, social networks, personalized health, entertainment, and many more.

This year’s conference was organized according to the following eight tracks and track chairs: Personalized Recommender Systems (Osnat ‘Ossi’ Mokryn, Eva Zangerle, and Markus Zanker), Adaptive Hypermedia, Semantic, and Social Web (Alexandra I. Cristea and Peter Brusilovsky), Intelligent User Interfaces (Elisabeth Lex and Marko Tkalcic), Technology-Enhanced Adaptive Learning (Judy Kay and Sharon Hsiao), Fairness, Transparency, Accountability, and Privacy (Bamshad Mobasher and Munindar P. Singh), Personalization for Persuasive and Behavior Change Systems (Julita Vassileva and Panagiotis Germanakos), Virtual Assistants and Personalized Human-robot Interaction (Radhika Garg and Cristina Gena), and Research Methods and Reproducibility (Odd Erik Gundersen and Dietmar Jannach).

Moreover, the conference featured a Late Breaking Results and Demo track, chaired by Veronika Bogina and Cataldo Musto, where research-in-progress containing original and unpublished accounts of innovative research ideas were encouraged, together with demonstrations that showcase implementations valuable for the community. In addition, there was a call to receive Doctoral Consortium submissions from graduate students, aiming to receive constructive

feedback and advice from experienced scholars in the community; this track was chaired by Rita Orji and Giovanni Stilo.

These calls for papers attracted numerous submissions that the program committee reviewed and accepted, resulting in the following statistics:

<i>Track</i>	<i>Reviewed</i>	<i>Accepted</i>	
Technical Papers	115	29	25%
Late Breaking Results and Demos	27	16	59%
Doctoral Consortium	13	9	69%
TOR	2	2	100%

Each submitted paper was reviewed by 3 or more reviewers and evaluated by the corresponding track chairs. It should be noted that this was the first year where short and full papers were not distinguished as part of the technical track of the conference. Valid submissions came from a total of 761 authors from 41 countries. We are thankful to all of these authors for choosing to submit to ACM UMAP 2022 and we thank the program committees for their diligence. Special mention deserve our Proceedings chairs (Noemi Mauro and Paul Taele) for managing all these submissions directly with ACM for the first time in this conference and through a transition to a new publication system, to generate two ACM volumes.

The ACM UMAP 2022 keynotes were special highlights of the conference program. These valuable and insightful talks can and will guide us to a better understanding of the future. Our three keynotes were:

- *“Human-Centered AI: Ensuring Human Control While Increasing Automation”* by Ben Shneiderman, Emeritus Distinguished University Professor in the Department of Computer Science & Human-Computer Interaction Lab, University of Maryland.
- *“Human Behavioral Data to help fight COVID-19”* by Nuria Oliver, Cofounder and Director of the ELLIS Unit Alicante Foundation.
- *“Recommender Systems for Better Human Choices”* by Francesco Ricci, a Full Professor at the Faculty of Computer Science, Free University of Bozen–Bolzano.

A set of 7 workshops and 3 tutorials rounded off the program. These were selected by our Workshop and Tutorial chairs, Mirko Marras and Elvira Popescu:

- (Workshop) APPS: 4th International Workshop on Adaptive and Personalized Privacy and Security
- (Workshop) cAESAR: 3rd International Workshop on Adapted intEraction with SociAl Robots
- (Workshop) ExUM: 1st International Workshop on Explainable User Modeling and Personalized Systems
- (Workshop) FairUMAP: 5th International Workshop on Fairness in User Modeling, Adaptation and Personalization
- (Workshop) GMAP: 1st International Workshop on Group Modeling, Adaptation and Personalization
- (Workshop) HAAPIE: 7th International Workshop on Human Aspects in Adaptive and Personalized Interactive Environments

- (Workshop) PATCH: 13th International Workshop on Personalized Access to Cultural Heritage – Towards Hybrid CH Experience
- (Tutorial) Ethical Considerations in User Modeling and Personalization (ECUMAP), by Jim Torresen and Atsushi Nakazawa
- (Tutorial) Semantics-aware Content Representations for Reproducible Recommender Systems (SCoRe), by Pasquale Lops, Cataldo Musto and Marco Polignano
- (Tutorial) User Control in Adaptive Information Access (UCAIA), by Peter Brusilovsky

Taking advantage of the hybrid format, and with a spirit of widening the UMAP community, we have paid special attention to different forms of support to attend the conference. First, to celebrate the co-location of three ACM conferences in Barcelona, we offered various discounted joint registration fees, either for virtual or in-person participation. Then, we provided discounted or free registration to those who need it, all of this thanks to our sponsors and Student Support chairs (Yong Zheng and Francesco Fabbri) who organized all the received requests and applied for additional funding when needed. All these actions and others were supervised and encouraged by our Justice, Equity, Diversity and Inclusion chairs (Julia Neidhardt and Sole Pera).

We would like to thank all who volunteered to make this conference a success, since putting together ACM UMAP 2022 was a team effort. We first thank the various chairs who spent a large amount of time managing the various tasks at hand—special mention for our Publicity and Web chairs Nasim Sonboli and Helma Torkamaan. Secondly, we thank the authors for providing the content of the program. The track chairs facilitated the review process and together with the program committee ensured a universally high quality of reviews and discussions. As in previous years, we also officially recognized Best Paper and James Chen Best Student Paper awards (sponsored by Springer publishers and User Modeling Inc. respectively) and exceptional reviewers with Best Reviewer awards. Last, but not least, we would like to thank our sponsors and supporters—ACM, SIGCHI, SIGWEB, NSF, User Modeling Inc, Springer, Universidad Nacional de Educación a Distancia (UNED), Universidad Autónoma de Madrid, University of Cagliari, now Publishers, and the UM Board—for their great support, which was needed to conduct this edition of the conference appropriately and successfully. They made possible, among other things, fair access funding and student support.

We hope that you will find this program interesting and thought-provoking, and that the conference program and proceedings provide you with a valuable opportunity to share ideas with other researchers and practitioners from institutions around the world. On behalf of all chairs: Thank you for your interest and support!

## Keynotes

# Human-Centered AI: Ensuring Human Control While Increasing Automation

## Keynote

**Ben Shneiderman**

### Abstract

A new synthesis is emerging that integrates AI technologies with Human-Computer Interaction to produce Human-Centered AI (HCAI). Advocates of this new synthesis seek to amplify, augment, and enhance human abilities, so as to empower people, build their self-efficacy, support creativity, recognize responsibility, and promote social connections. Researchers, developers, business leaders, policy makers and others are expanding the technology-centered scope of Artificial Intelligence (AI) to include Human-Centered AI (HCAI) ways of thinking. This expansion from an algorithm-focused view to embrace a human-centered perspective, can shape the future of technology so as to better serve human needs. Educators, designers, software engineers, product managers, evaluators, and government agency staffers can build on AI-driven technologies to design products and services that make life better for the users. These human-centered products and services will enable people to better care for each other, build sustainable communities, and restore the environment. The passionate advocates of HCAI are devoted to furthering human values, rights, justice, and dignity, by building reliable, safe, and trustworthy systems. The talk will include examples, references to further work, and discussion time for questions. These ideas are drawn from Ben Shneiderman's new book *Human-Centered AI* (Oxford University Press, February 2022). Further information at: <https://hcil.umd.edu/human-centered-ai>

### Bio

Ben Shneiderman (<http://www.cs.umd.edu/ben>) is an Emeritus Distinguished University Professor in the Department of Computer Science, Founding Director (1983-2000) of the Human-Computer Interaction Laboratory (<http://hcil.umd.edu>), and a

Member of the UM Institute for Advanced Computer Studies (UMIACS) at the University of Maryland. He is a Fellow of the AAAS, ACM, IEEE, NAI, and the Visualization Academy and a Member of the U.S. National Academy of Engineering. He has received six honorary doctorates in recognition of his pioneering contributions to human-computer interaction and information visualization. His widely-used contributions include the clickable highlighted web-links, high-precision touchscreen keyboards for mobile devices, and tagging for photos. Shneiderman's information visualization innovations include dynamic query sliders for Spotfire, development of treemaps for viewing hierarchical data, novel network visualizations for NodeXL, and event sequence analysis for electronic health records.

Ben is the lead author of *Designing the User Interface: Strategies for Effective Human-Computer Interaction* (6th ed., 2016). He co-authored *Readings in Information Visualization: Using Vision to Think* (1999) and *Analyzing Social Media Networks with NodeXL* (2nd edition, 2019). His book *Leonardo's Laptop* (MIT Press) won the IEEE book award for Distinguished Literary Contribution. The *New ABCs of Research: Achieving Breakthrough Collaborations* (Oxford, 2016) describes how research can produce higher impacts. His new book on *Human-Centered AI*<sup>1</sup>, was published by Oxford University Press in February 2022.

# Human Behavioral Data to help fight COVID-19

## Keynote

### Nuria Oliver

#### Abstract

The spread of infectious diseases that are transmitted from human to human largely depends on human behavior. Hence, modeling, understanding and predicting human behavior during a pandemic is of paramount importance. In my talk, I will describe the work that I did between March 2020 and March 2022, leading a multi-disciplinary team of 20+ volunteer scientists working very closely with the Presidency of the Valencian Government in Spain on 4 large areas at the intersection of human behavior, data and pandemics:

1. large-scale human mobility modeling;
2. computational epidemiological models (both metapopulation, individual and LSTM-based models);
3. predictive models; and
4. a large-scale, online citizen survey called the COVID19 impact survey with over 720,000 answers worldwide. This survey has enabled us to shed light on the impact that the pandemic is having on people's lives.

I will present the results obtained in each of these four areas, including winning the 500K XPRIZE Pandemic Response Challenge and obtaining a best paper award at ECML-PKDD 2021. I will share the lessons learned in this very special initiative of collaboration between the civil society at large (through the survey), the scientific community (through the Expert Group) and a public administration (through the Commissioner at the Presidency level). For those interested in knowing more, WIRED magazine published an extensive article describing our story: <https://www.wired.co.uk/article/valencia-ai-covid-data>.

**Acknowledgments:** My talk describes the work of over 20 scientists from the Data Science against COVID-19 taskforce, including researchers from the University of Alicante, the University Miguel Hernández, the Polytechnic University of Valencia, the University Jaume I, the CEU Cardenal Herrera University and FISABIO. The work has been partially funded by grants FONDOS SUPERA COVID-19 Santander-CRUE, 2020-2021, Fundación BBVA to scientific research teams SARS-CoV-2

COVID-19, IA4COVID19 2020-2022 and the Valencian Government via their Science, Innovation and Digital Society Ministry.

#### Bio

Nuria Oliver is Cofounder and Vicepresident of ELLIS (The European Laboratory for Learning and Intelligent Systems), cofounder and Director of the Institute of Human(ity)-centric AI (ELLIS Unit Alicante), Chief Data Scientist at Data-Pop Alliance and Chief Scientific Advisor to the Vodafone Institute. She earned her PhD from MIT. She is a Fellow of the ACM, IEEE and EurAI at the same time. She is an elect member at the Royal Academy of Engineering and the only Spanish scientist at SIGCHI Academy.

She has over 25 years of research experience in human-centric AI and is the author of over 180 widely cited scientific articles as well as an inventor of 40+ patents and a public speaker. She has authored the book "Artificial Intelligence, naturally", in collaboration with the Spanish Ministry of Economy and Digital Society. Her work is regularly featured in the media and has received numerous recognitions, including the Spanish National Computer Science Award, the MIT TR100 (today TR35), Young Innovator Award (first Spanish scientist to receive this award); the Digital European Woman of the Year Award; the Spanish Telecommunications Engineer of the Year award; the 2021 King Jaume I award in New Technologies and the 2021 Abie Technology Leadership Award.

In March of 2020, she was appointed Commissioner to the President of the Valencian Government on AI Strategy and Data Science against COVID-19. In that role, she has recently co-led ValenciaIA4COVID, the winning team of the 500k XPRIZE Pandemic Response Challenge. Their work was featured in WIRED, Politico and MSNBC, among other media.

# Recommender Systems for Better Human Choices

Keynote

Francesco Ricci

## Abstract

Recommender systems have been introduced as autonomous, and perhaps “dangerous,” algorithms that can predict their users’ preferences and generate recommendations for items that are actually useful for them. Therefore, a large part of the academic and industrial research has initially focussed on the problem of predicting the “true” users’ preferences. This approach has been surely influenced by the long tradition of research on user modelling and adaptation. However, in the last 10 years we have understood that giving to the users, by means of an RS, what they really want, is a simplistic reduction of the recommendation task. Hence, new goals and roles of RSs have been considered and among them we can note those deriving from the multistakeholder and multi-criteria nature of most of the recommendation scenarios. As a consequence of this analysis, the problem of generating useful recommendations was understood as not even simple to define, and clearly much more difficult to solve. In this talk I will reflect on some of the foundational problems of the research on RSs and indicate some promising lines of exploration that I have tried to address with my research group.

## Bio

Francesco Ricci is a full Professor at the Faculty of Computer Science, Free University of Bozen–Bolzano. He has there established a reference point for the research on recommender systems. He has been active with this

community as President of the Steering Committee of the ACM Conference on Recommender Systems, from 2007 to 2010. He was previously a Senior Researcher and the Technical Director of the E-commerce and Tourism Research Lab (eCTRL), ITC-IRST, Trento, Italy, from 2000 to 2006. From 1998 to 2000, he was a System Architect with the Research and Technology Department (process and reuse technologies), Sodalìa S.p.A. His research interests include recommender systems, user modeling, machine learning and ICT applications to travel and tourism. He is the author of more than two-hundred refereed publications. According to Google Scholar, he has an H-index of 58 and around 23,000 citations. He is the Co-Editor of the Recommender Systems Handbook (Springer 2022).

# Table of Contents

## Persuasion

<b>A Qualitative Analysis of the Persuasive Properties of Argumentation Schemes</b> .....	1
Ramon Ruiz-Dolz ( <i>Universitat Politècnica de València</i> ), Joaquin Taverner ( <i>Universitat Politècnica de València</i> ), Stella Heras ( <i>Universitat Politècnica de València</i> ), Ana García-Fornes ( <i>Universitat Politècnica de València</i> ), Vicente Botti ( <i>Universitat Politècnica de València</i> )	
<b>How to Ask for Donations? Learning User-Specific Persuasive Dialogue Policies through Online Interactions</b> .....	12
Nhat Tran ( <i>University of Pittsburgh</i> ), Malihe Alikhani ( <i>University of Pittsburgh</i> ), Diane Litman ( <i>University of Pittsburgh</i> )	
<b>Including Social Expectations for Trustworthy Proactive Human-Robot Dialogue</b> .....	23
Matthias Kraus ( <i>Ulm University</i> ), Nicolas Wagner ( <i>Ulm University</i> ), Nico Untereiner ( <i>Ulm University</i> ), Wolfgang Minker ( <i>Ulm University</i> )	
<b>Multidimensional Analysis of Sense of Agency During Goal Pursuit</b> .....	34
Roberto Legaspi ( <i>KDDI Research Institute, Inc.</i> ), Wenzhen Xu ( <i>KDDI Research Institute, Inc.</i> ), Tatsuya Konishi ( <i>KDDI Research Institute, Inc.</i> ), Shinya Wada ( <i>KDDI Research Institute, Inc.</i> ), Yuichi Ishikawa ( <i>KDDI Research Institute, Inc.</i> )	
<b>Nudging Towards Health? Examining the Merits of Nutrition Labels and Personalization in a Recipe Recommender System</b> .....	48
Ayoub El Majjodi ( <i>University of Bergen</i> ), Alain Starke ( <i>Wageningen University &amp; Research and University of Bergen</i> ), Christoph Trattner ( <i>University of Bergen</i> )	
<b>Walking with PACE – Personalized and Automated Coaching Engine</b> .....	57
Madhurima Vardhan ( <i>Google</i> ), Narayan Hegde ( <i>Google</i> ), Srujana Merugu ( <i>Google</i> ), Shantanu Prabhat ( <i>Google</i> ), Deepak Nathani ( <i>Google</i> ), Martin Seneviratne ( <i>Google</i> ), Nur Muhammad ( <i>Google</i> ), Pranay Reddy ( <i>Google</i> ), Sriram Lakshminarasimhan ( <i>Google</i> ), Rahul Singh ( <i>Google</i> ), Karina Lorenzana ( <i>Google</i> ), Eshan Motwani ( <i>Google</i> ), Partha Talukdar ( <i>Google</i> ), Aravindan Raghuveer ( <i>Google</i> )	

## Explanations and Recommendations

<b>Generating Recommendations with Post-Hoc Explanations for Citizen Science</b> .....	69
Daniel Ben Zaken ( <i>Ben-Gurion University</i> ), Guy Shani ( <i>Ben-Gurion University</i> ), Avi Segal ( <i>Ben-Gurion University</i> ), Darlene Cavalier ( <i>Arizona State University</i> ), Kobi Gal ( <i>Ben-Gurion University and University of Edinburgh</i> )	
<b>Entity-Enhanced Graph Convolutional Network for Accurate and Explainable Recommendation</b> .....	79
Qinqin Wang ( <i>University College Dublin</i> ), Elias Tragos ( <i>University College Dublin</i> ), Neil Hurley ( <i>University College Dublin</i> ), Barry Smyth ( <i>University College Dublin</i> ), Aonghus Lawlor ( <i>University College Dublin</i> ), Ruihai Dong ( <i>University College Dublin</i> )	
<b>Evaluation of an Engagement-Aware Recommender System for People with Dementia</b> .....	89
Lars Steinert ( <i>University of Bremen</i> ), Fynn Linus Kölling ( <i>University of Bremen</i> ), Felix Putze ( <i>University of Bremen</i> ), Dennis Küster ( <i>University of Bremen</i> ), Tanja Schultz ( <i>University of Bremen</i> )	
<b>Investigating the Value of Subtitles for Improved Movie Recommendations</b> .....	99
Sagi Eden ( <i>Ben-Gurion University of the Negev</i> ), Amit Livne ( <i>Ben-Gurion University of the Negev</i> ), Oren Sar Shalom ( <i>Meta</i> ), Bracha Shapira ( <i>Ben-Gurion University of the Negev</i> ), Dietmar Jannach ( <i>University of Klagenfurt</i> )	
<b>The Challenges of Providing Explanations of AI Systems When They Do Not Behave Like Users Expect</b> .....	110
Maria Riveiro ( <i>Jönköping University</i> ), Serge Thill ( <i>Radboud University</i> )	

<b>Top-N Recommendation Algorithms: A Quest for the State-of-the-Art.....</b>	<b>121</b>
Vito Walter Anelli ( <i>Politecnico di Bari</i> ), Alejandro Bellogín ( <i>Universidad Autónoma de Madrid</i> ), Tommaso Di Noia ( <i>Politecnico di Bari</i> ), Dietmar Jannach ( <i>University of Klagenfurt</i> ), Claudio Pomo ( <i>Politecnico di Bari</i> )	

<b>Travelers vs. Locals: The Effect of Cluster Analysis in Point-of-Interest Recommendation.....</b>	<b>132</b>
Pablo Sánchez ( <i>Universidad Autónoma de Madrid</i> ), Linus W. Dietz ( <i>Technical University of Munich</i> )	

## Classifying User Behavior

<b>HateVersarial: Adversarial Attack Against Hate Speech Detection Algorithms on Twitter .....</b>	<b>143</b>
Edita Grolman ( <i>Ben-Gurion University of the Negev</i> ), Hodaya Binyamini ( <i>Ben-Gurion University of the Negev</i> ), Asaf Shabtai ( <i>Ben-Gurion University of the Negev</i> ), Yuval Elovici ( <i>Ben-Gurion University of the Negev</i> ), Ikuya Morikawa ( <i>Fujitsu Limited</i> ), Toshiya Shimizu ( <i>Fujitsu Limited</i> )	

<b>Low-Level Activity Patterns as Indicators of User Familiarity with Websites.....</b>	<b>153</b>
He Yu ( <i>University of Manchester</i> ), Simon Harper ( <i>University of Manchester</i> ), Markel Vigo ( <i>University of Manchester</i> )	

<b>On the Benefits of using Hidden Markov Models to Predict Emotions .....</b>	<b>164</b>
Yuyan Wu ( <i>Universitat de València</i> ), Miguel Arevalillo-Herráez ( <i>Universitat de València</i> ), Stamos Katsigiannis ( <i>Durham University</i> ), Naeem Ramzan ( <i>University of the West of Scotland</i> )	

<b>User’s Knowledge and Information Needs in Information Retrieval Evaluation .....</b>	<b>170</b>
Dima El Zein ( <i>Université Côte d’Azur</i> ), Célia da Costa Pereira ( <i>Université Côte d’Azur</i> )	

## Intelligent User Interfaces 1

<b>How Suitable Is Your Naturalistic Dataset for Theory-based User Modeling?.....</b>	<b>179</b>
Aini Putkonen ( <i>Aalto University</i> ), Aurélien Nioche ( <i>Aalto University</i> ), Ville Tanskanen ( <i>University of Helsinki</i> ), Arto Klami ( <i>University of Helsinki</i> ), Antti Oulasvirta ( <i>Aalto University</i> )	

<b>Modeling User Strategies on Interactive Information Dashboards.....</b>	<b>191</b>
Mohammed Alhamadi ( <i>The University of Manchester</i> ), Sarah Clinch ( <i>The University of Manchester</i> ), Markel Vigo ( <i>The University of Manchester</i> )	

<b>Navigational, Informational or Punk-Rock? An Exploration of Search Intent in the Musical Domain .....</b>	<b>202</b>
Bruno Sguerra ( <i>Deezer Research</i> ), Marion Baranes ( <i>Deezer Research</i> ), Romain Hennequin ( <i>Deezer Research</i> ), Manuel Moussallam ( <i>Deezer Research</i> )	

<b>Taming User-Interface Heterogeneity with Uniform Overlays for Blind Users.....</b>	<b>212</b>
Utku Uckun ( <i>Stony Brook University</i> ), Rohan Tumkur Suresh ( <i>Stony Brook University</i> ), Md Javedul Ferdous ( <i>Old Dominion University</i> ), Xiaojun Bi ( <i>Stony Brook University</i> ), IV Ramakrishnan ( <i>Stony Brook University</i> ), Vikas Ashok ( <i>Old Dominion University</i> )	

<b>Understanding the Role of Explanation Modality in AI-assisted Decision-making.....</b>	<b>223</b>
Vincent Robbmond ( <i>Delft University of Technology</i> ), Oana Inel ( <i>University of Zurich</i> ), Ujwal Gadiraju ( <i>Delft University of Technology</i> )	

## Intelligent User Interfaces 2

<b>Critiquing-based Modeling of Subjective Preferences .....</b>	<b>234</b>
Alan Medlar ( <i>University of Helsinki</i> ), Jing Li ( <i>University of Helsinki</i> ), Yang Liu ( <i>University of Helsinki</i> ), Dorota Głowacka ( <i>University of Helsinki</i> )	

<b>I Cannot See Students Focusing on My Presentation; Are They Following Me? Continuous Monitoring of Student Engagement through “Stungage”.....</b>	<b>243</b>
Snigdha Das ( <i>Indian Institute of Technology Kharagpur</i> ), Sandip Chakraborty ( <i>Indian Institute of Technology Kharagpur</i> ), Bivas Mitra ( <i>Indian Institute of Technology Kharagpur</i> )	

<b>Is More Always Better? The Effects of Personal Characteristics and Level of Detail on the Perception of Explanations in a Recommender System</b> .....	254
Mohamed Amine Chatti ( <i>University of Duisburg-Essen</i> ), Mouadh Guesmi ( <i>University of Duisburg-Essen</i> ), Laura Vorgerd ( <i>University of Duisburg-Essen</i> ), Thao Ngo ( <i>University of Duisburg-Essen</i> ), Shoeb Joarder ( <i>University of Duisburg-Essen</i> ), Qurat Ul Ain ( <i>University of Duisburg-Essen</i> ), Arham Muslim ( <i>National University of Sciences and Technology</i> )	
<b>The Impact of Digital Nudging Techniques on the Formation of Self-Assembled Crowd Project Teams</b> .....	265

# UMAP 2022 Committees

## Organization

- General Chairs:** Alejandro Bellogín (Universidad Autónoma de Madrid, Spain)  
Ludovico Boratto (University of Cagliari, Italy)  
Olga C. Santos (UNED, Spain)
- Program Chairs:** Liliana Ardissono (Università di Torino, Italy)  
Bart Knijnenburg (Clemson University, USA)
- Workshop and Tutorial Chairs:** Mirko Marras (University of Cagliari, Italy)  
Elvira Popescu (University of Craiova, Romania)
- Posters, LBR, and Demo Chairs:** Veronika Bogina (Haifa University, Israel)  
Cataldo Musto (Università degli Studi di Bari, Italy)
- Doctoral Consortium Chairs:** Rita Orji (Dalhousie University, Canada)  
Giovanni Stilo (University of L'Aquila, Italy)
- Publicity and Web Chairs:** Nasim Sonboli (University of Colorado Boulder, USA)  
Helma Torkamaan (University of Duisburg-Essen, Germany)
- Proceedings Chairs:** Noemi Mauro (University of Torino, Italy)  
Paul Taele (Texas A&M University, USA)
- Inclusion and Accessibility Chairs:** Julia Neidhardt (TU Wien, Austria)  
Sole Pera (Boise State University, USA)
- Sponsor Chair:** Ludovik Coba (Koa Health, Spain)
- Students Support Chairs:** Francesco Fabbri (Universitat Pompeu Fabra & Eurecat, Spain)  
Yong Zheng (Illinois Institute of Technology, USA)
- Local Chairs:** Cristian Consonni (Eurecat, Spain)  
Mihnea Tufiş (Eurecat, Spain)
- Streaming & Broadcasting Chairs:** Walter Anelli (Politecnico di Bari, Italy)  
Lesly Miculicich (Microsoft, USA)  
Lorena Recalde (Escuela Politécnica Nacional, Ecuador)  
Meté Sertkan (TU Wien, Austria)

## Track Chairs

Peter Brusilovsky (University of Pittsburgh, United States)  
Alexandra I. Cristea (Durham University, UK)  
Panagiotis Germanakos (SAP SE, Germany)  
Radhika Garg (Syracuse University, United States)  
Cristina Gena (University of Torino, Italy)  
Odd Erik Gundersen (Norwegian University of Science and Technology, Norway)  
Sharon Hsiao (Santa Clara University, United States)  
Dietmar Jannach (University of Klagenfurt, Austria)  
Judy Kay (University of Sydney, Australia)  
Elisabeth Lex (Graz University of Technology, Austria)  
Bamshad Mobasher (DePaul University, United States)  
Osnat ‘Ossi’ Mokryn (University of Haifa, Israel)  
Munindar P. Singh (NC State University, United States)  
Marko Tkalčič (University of Primorska, Slovenia)  
Julita Vassileva (University of Saskatchewan, Canada)  
Eva Zangerle (University of Innsbruck, Austria)  
Markus Zanker (University of Bolzano, Italy)

## Program Committee Members

Ifeoma Adaji (University of Saskatchewan, Canada)  
Kenro Aihara (Tokyo Metropolitan University, Japan)  
Nirav Ajmeri (University of Bristol, United Kingdom)  
Chiara Alzetta (Istituto di Linguistica Computazionale “Antonio Zampolli”, Italy)  
Liliana Ardissono (University of Torino, Italy)  
Chetan Arora (Deakin University, Australia)  
Erman Ayday (Case Western Reserve University, United States and Bilkent University, Turkey)  
Esma Aïmeur (University of Montreal, Canada)  
Ryan Baker (University of Pennsylvania, United States)  
Francesco Barile (Maastricht University, Netherlands)  
Beatriz Barros (University of Malaga, Spain)  
Christine Bauer (Utrecht University, Netherlands)  
Mathias Bauer (xpect AG, Germany)  
Marios Belk (Cognitive UX GmbH, Germany)  
Shlomo Berkovsky (Macquarie University, Australia)  
Beatrice Biancardi (LINEACT CESI, France)  
Maria Bielikova (Kempelen Institute of Intelligent Technologies, Slovakia)  
Pradipta Biswas (Indian Institute of Science, India)  
Veronika Bogina (Haifa University, Israel)  
Brandon Booth (University of Colorado Boulder, United States)  
Alessandro Bozzon (Delft University of Technology, Netherlands)  
Derek Bridge (University College Cork, Ireland)  
Robin Burke (University of Colorado, Boulder, United States)  
André Calero Valdez (University of Lübeck, Germany)  
Iván Cantador (Universidad Autónoma de Madrid, Spain)  
Sylvain Castagnos (CNRS – LORIA – University of Lorraine, France)  
Federica Cena (University of Torino, Italy)  
Li Chen (Hong Kong Baptist University, Hong Kong)  
Victor Codina (Adevinta, Spain)  
Robin Cohen (University of Waterloo, Canada)  
Cristina Conati (University of British Columbia, Canada)  
Owen Conlan (Trinity College Dublin, Ireland)  
Argyris Constantinides (University of Cyprus, Cyprus)  
Marios Constantinides (University College London, United Kingdom)

Evandro Costa (Federal University of Alagoas, Brazil)  
Rossana Damiano (Università di Torino, Italy)  
Berardina Nadja De Carolis (University of Bari Aldo Moro, Italy)  
Marco de Gemmis (University of Bari Aldo Moro, Italy)  
Pasquale De Meo (Vrije Universiteit Amsterdam, Italy)  
Yashar Deldjoo (Polytechnic University of Bari, Italy)  
Amra Delić (University of Sarajevo, Bosnia and Herzegovina)  
Carrie Demmans Epp (University of Alberta, Canada)  
Matt Dennis (University of Portsmouth, United Kingdom)  
Michel Desmarais (Polytechnique Montréal, Canada)  
Himel Dev (University of Illinois at Urbana-Champaign, United States)  
Tommaso Di Noia (Politecnico di Bari, Italy)  
Yannis Dimitriadis (University of Valladolid, Spain)  
Peter Dolog (Aalborg University, Denmark)  
Fan Du (Adobe Research, United States)  
Mehdi Elahi (University of Bergen, Norway)  
Hui Fang (Shanghai University of Finance and Economics, China)  
Alexander Felfernig (TU Graz, Austria)  
Maurizio Ferrari Dacrema (Politecnico di Milano, Italy)  
Bruce Ferwerda (Jönköping University, Sweden)  
Huber Flores (University of Tartu, Estonia)  
Flavius Frasincar (Erasmus University Rotterdam, Netherlands)  
Ujwal Gadiraju (Delft University of Technology, Netherlands)  
Diego García-Saiz (University of Cantabria, Spain)  
Fabio Gasparetti (Università Roma Tre, Italy)  
Mouzhi Ge (Deggendorf Institute of Technology, Germany)  
Dorota Glowaka (University of Helsinki, Finland)  
Sabine Graf (Athabasca University, Canada)  
David Graus (Randstad Groep Nederland, Netherlands)  
Mark Graus (Obvion, Netherlands)  
Julio Guerra (University of Pittsburgh, United States)  
Tural Gurbanov (IVI, Russia)  
Ella Haig (University of Portsmouth, United Kingdom)  
Jaap Ham (Eindhoven University of Technology, Netherlands)  
Hanna Hauptmann (Utrecht University, Netherlands)  
Yangyang He (Clemson University, United States)  
Neil Heffernan (Worcester Polytechnic Institute, United States)  
Denis Helic (Graz University of Technology, Austria)  
Eelco Herder (Radboud University Nijmegen, Netherlands)  
Balázs Hidasi (Gravity R&D, Hungary)  
Andreas Holzinger (Medical University and Graz University of Technology, Austria)  
Geert-Jan Houben (Delft University of Technology, Netherlands)  
Oana Inel (University of Zurich, Switzerland)  
Bogdan Ionescu (Politehnica University of Bucharest, Romania)  
Srecko Joksimovic (University of South Australia, Australia)  
Saikishore Kalloori (ETH Zurich, Switzerland)  
Kostas Karpouzis (Panteion University of Social and Political Sciences, Greece)  
Gilad Katz (Ben-Gurion University of the Negev, Israel, Israel)  
Branko Kavšek (University of Primorska, Slovenia)  
Benjamin Kille (Norwegian University of Science and Technology, Norway)  
Styliani Kleanthous (Open University of Cyprus and CYENS Centre of Excellence, Cyprus)  
Matjaž Kljun (University of Primorska, Fannit, Slovenia)  
Bart Knijnenburg (Clemson University, United States)  
Michal Kompan (Kempelen Institute of Intelligent Technologies, Slovakia)  
Irena Koprinska (University of Sydney, Australia)  
Dominik Kowald (Know-Center, Austria)  
Milos Kravcik (DFKI GmbH, Germany)  
Tsvi Kuflik (University of Haifa, Israel)  
Vikas Kumar (KenSci, United States)

Emanuel Lacic (TU Graz, Austria)  
Monica Landoni (Università della Svizzera italiana, Switzerland)  
Roy Ka-Wei Lee (Singapore University of Technology and Design, Singapore)  
James Lester (North Carolina State University, United States)  
Antonio Lieto (University of Turin, Department of Computer Science, Italy)  
Carla Limongelli (Università Roma Tre, Italy)  
Benedikt Loepp (University of Duisburg-Essen, Germany)  
Pasquale Lops (University of Bari, Italy)  
Bernd Ludwig (University Regensburg, Germany)  
Ioanna Lykourantzou (Utrecht University, Netherlands)  
George Magoulas (University of London, United Kingdom)  
Mirko Marras (University of Cagliari, Italy)  
Estefania Martin (Universidad Rey Juan Carlos, Spain)  
Judith Masthoff (Utrecht University, Netherlands and University of Aberdeen, UK)  
Noemi Mauro (University of Torino, Italy)  
Gordon McCalla (University of Saskatchewan, Canada)  
Weizhi Meng (Technical University of Denmark, Denmark)  
Alessandro Micarelli (Università Roma Tre, Italy)  
Tanja Mitrovic (University of Canterbury, New Zealand)  
Robert Moro (Kempelen Institute of Intelligent Technologies, Slovakia)  
Pradeep Kumar Murukannaiah (Delft University of Technology, Netherlands)  
Cataldo Musto (University of Bari, Italy)  
Fedelucio Narducci (Politecnico di Bari, Italy)  
Julia Neidhardt (Vienna University of Technology, Austria)  
Thuy Ngoc Nguyen (Carnegie Mellon University, United States)  
Juan Carlos Nieves (Umeå University, Sweden)  
Rita Orji (Dalhousie University, Canada, Canada)  
Veljko Pejovic (University of Ljubljana, Slovenia)  
Maria Soledad Pera (Boise State University, United States)  
Matevž Pesek (University of Ljubljana, Slovenia, Slovenia)  
Luiz Pizzato (Commonwealth Bank of Australia, Australia)  
Lara Quijano-Sanchez (Universidad Autónoma de Madrid, Spain)  
Heri Ramampiaro (Norwegian University of Science and Technology, Norway)  
Amon Rapp (University of Torino, Italy)  
Francesco Ricci (Free University of Bozen-Bolzano, Italy)  
Maria Mercedes T. Rodrigo (Ateneo de Manila University, Philippines)  
Laurens Rook (Delft University of Technology, Netherlands)  
Domenico Rosaci (University Mediterranea of Reggio Calabria, Italy)  
Ariel Rosenfeld (Bar-Ilan University, Israel)  
Dimitris Sacharidis (Université Libre de Bruxelles, Belgium)  
Alan Said (University of Gothenburg, Sweden)  
Giuseppe Sansonetti (Università Roma Tre, Italy)  
Filippo Sciarrone (Università Roma Tre, Italy)  
Giovanni Semeraro (University of Bari, Italy)  
Saeid Shamsaliei (Norwegian University of Science and Technology, Norway)  
Avital Shulner Tal (University of Haifa, Israel)  
Kirsten Smith (University of Southampton, United Kingdom)  
Barry Smyth (University College Dublin, Ireland)  
Sergey Sosnovsky (Utrecht University, Netherlands)  
Jessica Staddon (JP Morgan Chase, United States)  
Alain Starke (Wageningen University & Research, Netherlands)  
Ben Steichen (California State Polytechnic University, Pomona, United States)  
Zhu Sun (Macquarie University, Australia, Australia)  
Michelle Taub (University of Central Florida, United States)  
Marco Temperini (Sapienza University of Rome, Italy)  
Antonela Tommasel (ISISSTAN Research Institute, CONICET-UNCPBA, Argentina)  
Helma Torkamaan (University of Duisburg-Essen, Germany)  
Ilaria Torre (University of Genoa, Italy)  
Thomas Tran (University of Ottawa, Canada)

Trang Tran (Graz University of Technology, Austria)  
Chun-Hua Tsai (University of Nebraska at Omaha, United States)  
Shoujin Wang (University of Technology, Sydney, Australia)  
Ingmar Weber (Qatar Computing Research Institute, Qatar)  
Alan Wecker (University of Haifa, Israel)  
Stephan Weibelzahl (Private University of Applied Sciences Göttingen, Germany)  
Hongyi Wen (Cornell University, United States)  
Martijn Willemsen (Eindhoven University of Technology, Netherlands)  
Wolfgang Wörndl (Technical University of Munich, Germany)  
Jie Yang (Delft University of Technology, United States)  
Longqi Yang (Microsoft, United States)  
Pinar Yolum (Utrecht University, Netherlands)  
Kun Yu (University of Technology Sydney, Australia)  
Massimo Zancanaro (University of Trento, Italy)  
Diego Zapata-Rivera (Educational Testing Service, United States)  
Jie Zhang (Nanyang Technological University, Singapore)  
Yong Zheng (Illinois Institute of Technology, United States)  
Jürgen Ziegler (University of Duisburg-Essen, Germany)  
Ingrid Zukerman (Monash University, Australia)  
Klen Čopič Pucihar (University of Primorska, Slovenia)

## Reviewers

Muhammad Anwar (Virtual University of Pakistan, Pakistan)  
Ines Arous (University of Fribourg, Switzerland)  
Mobina Beheshti (Eastern Mediterranean University, Turkey)  
Gerry Chan (Carleton University, Canada)  
Himel Dev (Bangladesh University of Engineering and Technology, Bangladesh)  
Tomislav Duricic (Graz University of Technology, Austria)  
Emre Erdogan (Utrecht University, Netherlands)  
Soheila Garshasbi (University of Wollongong, Australia)  
Reza Ghaiummy Anaraky (Clemson University, United States)  
Ashish Gurung (Worcester Polytechnic Institute, United States)  
Aaron Haim (Worcester Polytechnic Institute, United States)  
Allyson Hauptman (Clemson University, United States)  
Zhongli Filippo Hu (Università degli Studi di Torino, Italy)  
Andrea Iovine (Università degli Studi di Bari Aldo Moro, Italy)  
Mehtab Iqbal (Clemson University, United States)  
Simone Kopeinik (TU Graz, Austria)  
Murthy L R D (Indian Institute of Science, India)  
Aminata Ndiaye Mbodj (Clemson University, United States)  
Corrado Mencar (Università degli Studi di Bari Aldo Moro, Italy)  
Oladapo Oyeboode (Dalhousie University, Canada)  
Marco Polignano (Università degli Studi di Bari Aldo Moro, Italy)  
Xiao Sha (Nanyang Technological University, Singapore)  
Lu Zhang (Nanyang Technological University, Singapore)
